

Dr. Emily Carter

Research Scientist | e.carter.phd@email.com | 617-555-8822

Education

Ph.D. in Computational Biology

Massachusetts Institute of Technology (MIT) | 2020 - 2024

Dissertation: "Machine Learning Approaches to Genomic Sequencing Anomalies"

M.S. in Bioinformatics

Stanford University | 2018 - 2020

B.S. in Biology

University of Washington | 2014 - 2018

Selected Publications

* Carter, E. (2023). "Neural Networks in DNA Mapping." Journal of Computational Biology.

* Carter, E. (2021). "Predictive Modeling for Protein Folding." Bioinformatics Review.

Experience

Postdoctoral Researcher | Broad Institute | 2024 - Present

Leading a team of 4 researchers in analyzing large-scale genetic datasets using Python and R.
