Blockchain Developer | github.com/kzhao-crypto | kevin@email.com

Open Source & Personal Projects

Ether-Wallet-CLI (Rust)

- * Engineered a command-line Ethereum wallet capable of key generation, signing transactions, and querying smart contracts.

- * Garnered over 400 stars on GitHub and accepted pull requests from 15 contributors.

DeFi Yield Aggregator (Solidity, Next.js)

- * Deployed smart contracts to the Goerli testnet that automatically route funds to the highest-yielding liquidity pools.

- * Built the frontend interface using Next.js and ethers.js.

Work Experience

Junior Web Developer | AgencyX | 2022 - 2024

- * Built responsive websites for local businesses using HTML/CSS and basic JavaScript.

Education

Self-Taught Programmer
