

Priya Patel, Cloud Solutions Architect

ppatel@techdomain.net | 206-555-9988 | GitHub: ppatel-cloud

Core Technologies: AWS (EC2, S3, RDS, Lambda, VPC, IAM, Route53, EKS), GCP (GKE, Cloud Functions, Pub/Sub), Kubernetes, Docker, Terraform, Ansible, Chef, Jenkins, GitLab CI/CD, Python, Go, Bash, Prometheus, Grafana, ELK Stack, MongoDB, PostgreSQL, Redis, Apache Kafka.

Experience: Principal Cloud Engineer | DataSynergy (2021-Present)

Architected highly available, fault-tolerant microservices architecture on AWS EKS across 3 availability zones handling 15k TPS. Authored 100+ Terraform modules for infrastructure as code (IaC) deployment. Reduced CI/CD pipeline build times by 40% through Docker image optimization and Jenkins parallelization. Implemented zero-trust security protocols using AWS IAM and HashiCorp Vault. Directed migration of monolithic legacy on-premise PostgreSQL databases to Amazon Aurora with zero downtime.

Experience: DevOps Engineer | StreamNet (2017-2021)

Deployed and maintained containerized applications using Docker Swarm and later Kubernetes. Automated server provisioning utilizing Ansible playbooks. Scripted Python utilities for automated log parsing and anomaly detection in ELK stack.
